

**HM Abrasives**

## HM Abrasives

ContraAbrasives are ideal for grinding and roughening floors, masonry as well as wall areas and offer an extremely high stock removal rate and durability. The abrasive tools studded with hard and sharp carbide grains ensure precise work and results of the highest quality!

### Double-sided HM abrasive wheel

Carbide abrasive wheel for floor grinder with star and cross tip.

**Diameter:**  
375 mm, 400 mm  
**Grain size:**  
K10, K14, K24 und K36

Suitable for sanding spackling compounds and screeds, as well as for removing adhesive residues and other coverings.

### HM Abrasive Ring and sanding Block

Carbide abrasive ring for floor grinder

**Diameter:**  
400 mm und 440 mm  
**Grain size:**  
K4, K6, K8, K10 und K14

Carbide sanding block for floor grinder

**Diameter:**  
127 mm  
**Grain size:**  
K4, K6, K8, K10 und K14

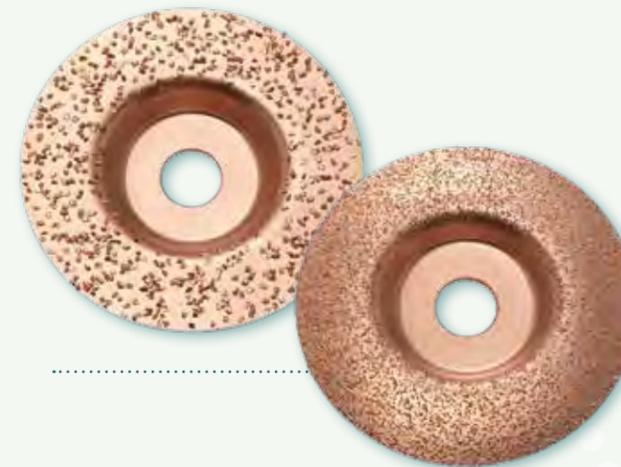

Suitable for rough sanding work such as removing adhesive residues and other covering residues.

### HM Carbide abrasive wheel for angle grinder

Carbide abrasive wheel for angle grinder (flat and curved)

**Diameter:**  
125 mm  
**Grain size:**  
K14, K24, K36

Suitable for machine grinding and roughening of masonry, especially for cement, concrete, plaster, mortar, brick, aerated concrete, spackle, tile adhesive residues, etc.

### HM sanding board with angle and sanding block

**Dimensions sanding board** 12 x 19 cm  
**Dimensions sanding block:** 12,5 x 7 cm  
**Grain size:**  
K14, K24, K36, K60

Suitable for sanding and roughening masonry, especially for cement, concrete, plaster, mortar, brick, aerated concrete, spackling compound, fiberglass-reinforced plastics, epoxy resin coatings, tile adhesive residues, etc.

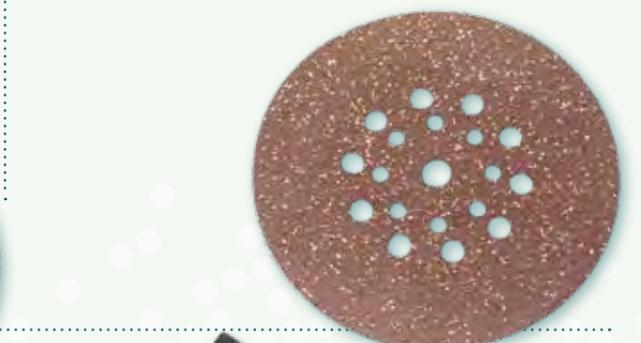

### HM abrasive grid

Carbide abrasive grid for edge and rotary grinders.

**Diameter:**  
150 mm, 225 mm und 400 mm  
**Grain size:**  
K14 bis K120

Suitable for removing stubborn coating residues and coatings such as varnish and paint.

 The sanding grid is equipped with a velcro holder.

Carbide sanding block

Carbide sanding board with 90 degree angle

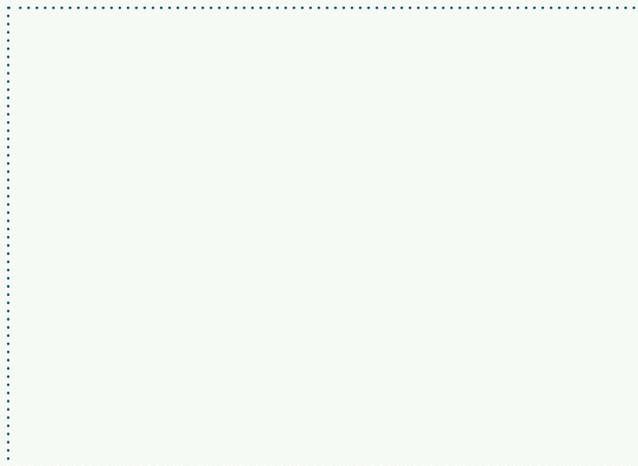

## Contra Abrasives & Tapes

We are a Danish developer and manufacturer of premium grinding tools and focus on highest quality and precision. In addition to our standard products, we offer many products in close cooperation with our customers and adapted to their individual needs. In the development of our products, we rely on the use of the latest technologies and during production we combine grains made of tungsten carbide - one of the hardest and most wear-resistant materials in the world - with a metallic body, which ensures high grinding efficiency and a long service life. Of course, all of the products we manufacture are compatible with the leading brands of electric abrasive tool manufacturers.
